For ISU study abroad programs at partner institutions abroad, courses offered for credit are automatically transferred to ISU. Transfer courses are usually listed at ISU with a general ending such as 100, 200, 300, or 400. To determine how these transfer courses are applied to specific degree requirements in your major/minor, speak with your academic advisor. Should you need further assistance or approval from your college regarding any transfer credit issue, contact the college advisor listed below.
